RENTCafé CRM

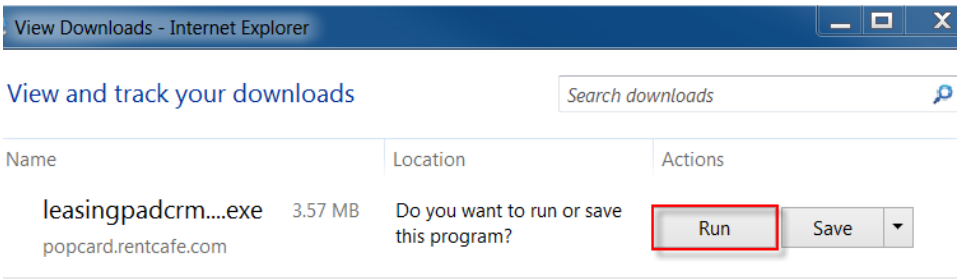
The installation should be completed on all leasing computers.

Preparation:

- Before Installing the pop applet, please make sure
  - Port 8024 is open
  - There isn't a firewall blocking the application

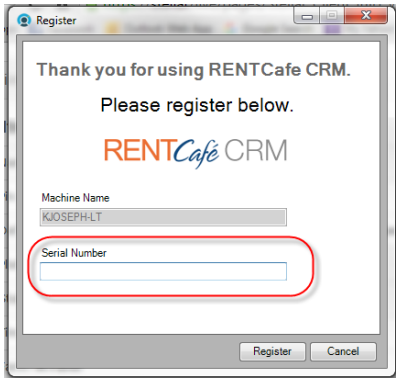
Step 1:

- To install the pop notification for LeasingPad CRM please click here
- A cautionary message may be displayed. If so, please disregard and continue by clicking "Run".



Step 2:

- Once the installation is complete a registration box will appear.
- Enter the unique serial number provided and click "Register".
- ***Please note: Serial numbers may only be used once.***



The pop takes place when an incoming phone call or email occurs and to notify you when an activity is missed. Once your tracking campaigns are updated by your Marketing Source Representatives you will begin to see the pop notification below on your desktop. ***Please Note: Clicking on a popped activity will take you to the VoyagerPlus URL and ask for login information if not already logged in.***
