To ensure the full return of the Security Deposit to the Tenant, the Premises must be left in the condition in which the Tenant received it (less normal wear and tear). Please refer to the Lease Agreement for additional vacating instructions.

EMERGENCY RESPONSE PROCEDURES

MEDICAL EMERGENCY PROCEDURES

If a person becomes ill or is seriously injured in the building, call 911.

OVERT CRIMINAL ACTIVITY

If you suspect a crime is in progress or see a suspicious person in the building, immediately dial 911. After you contact the police, notify us of the situation.

EMERGENCY CONTACT

Rockford Property Management requires a contact name and telephone number for an individual to be reached in the event of an emergency or a situation that may affect or has affected an apartment. To ensure that names and/or telephone numbers remain current, please notify us of any changes.

IN CASE OF FIRE

You should be aware of the following:

- All Available Exits
- Location of Fire Alarm Pull Stations
- Location of Fire Extinguishers

If you hear a fire alarm, evacuate the building. Do not re-enter until management or a fire department official confirms that it is safe to return. If a fire occurs in your area, you should take the following steps as quickly as possible:

1. Notify the building occupants by activating the nearest fire alarm pull station. Be aware that activating a fire alarm station as a prank is a crime and will be reported to law enforcement.

2. Call the Fire Department immediately by dialing 911.
3. If you are in the fire, evacuate immediately or extinguish. Only attempt to extinguish the fire if someone's life is in immediate danger or the fire is small enough to contain easily. It is more important to confine a fire and evacuate the area. Maintain contact with a wall and check to see if doors are hot before opening them. If hot, seek an alternative route. Open doors slowly and prepare to close them if heat, smoke or flames are present. Confine the fire by closing off the area. Close doors behind you as you exit. Provide assistance for those who need help.
4. Do not use elevators. Exit only by the stairs. Use handrails and descend single file to allow room for firefighters to ascend. Please be familiar with the exit nearest your apartment.
5. If you are in an elevator, remain calm. "Automatic Return to Lobby" is initiated by smoke detectors located in the elevator lobby, machine rooms and some hoist ways. Upon activation, both elevators return nonstop to the lobby, where they park with the doors open. This operation ensures that no one is trapped in the elevators and makes them available for use by emergency personnel.
6. Stay low. Smoke and toxic gases rise. Cleaner air is near the floor.
7. If you are unable to escape from the room you are in, block the openings around the door and the heating and air conditioning vents with towels, blankets, rugs, clothing, etc. Call for help if using a phone.
8. After exiting the building, move away from it to allow firefighters and fire equipment easy access and to avoid any falling debris.
9. Account for occupants in a safe area. If someone is missing, alert a firefighter. All occupants, building staff and management will meet across the street.
10. Provide information to first responders regarding fire location or locations of missing occupants.
11. Never re-enter a burning building.

KEEPING YOUR COMMUNITY CRIME-FREE

You should always be aware of safety and security in your apartment community. To help keep your community crime-free, please review some of the following crime deterrents:

1. Keep all valuable personal items such as keys, wallets or purses with you and never leave them in plain sight.
2. Ask for and verify identification of unfamiliar and unexpected visitors, delivery persons or repair persons before allowing them into your apartment.
3. Inform authorities of any suspicious persons or vehicles.
4. Never leave an unattended apartment unlocked, even for a short time.
5. Keep your apartment door locked even while you are present to prevent unauthorized entry.
