

EVOLV

RESHAPING RENTAL LIVING

Recycling & Textiles Program

Evolv Rentals is proud to partner with Quantum Lifecycle Partners and Goodwill to pilot an E-Waste & Textiles Diversion Program to help residents live a more sustainable life.

Many are unaware of how these materials should be properly disposed of, which leads to textiles and e-waste ending up in landfills. This adds unnecessary volume to our growing landfill problem and leads to hazardous materials like old cell phones or batteries releasing toxic heavy metals into the environment.

This innovative program aims to divert these often-overlooked waste streams from landfills and educate residents at Evolv on recycling and environmental sustainability.

To participate is simple – **residents will find Textile and E-Waste Drop Bins in the parking garage on P1**, where they can securely disregard unwanted electronics and clothes.
